

CampbellCrimpnoology™ offers crimping flexibility for your multi-purpose hose applications.

Crimpnoology Nipple

Flanges meet ANSI/ASME B16.5 150 pound class specifications.

CRIMPNOLOGY NIPPLES

Features & Benefits

- Designed for use with Campbell Interlocking Ferrules.
- Fittings use the same ferrules as Campbell COBRA Parts C and E, ChemJoint Couplings, and Goodyear InstaLock Cam & Groove Couplings to keep ferrule inventory low and flexible.
- Interlock groove on fitting locks ferrule into place for the ultimate in holding power.
- Graduated serration pattern (sharper near the interlock, rounder near the end, with smooth end detail to reduce potential failure caused by abrasion) grips, seals, and protects hose.
- Shank and ferrule lengths are matched for performance and to avoid potential hose tube or cover damage.
- Crimped assemblies are low profile and eliminate sharp edges from clamp buckles.

Recommended Hose Attachment

- Interlocking ferrules

Recommended Use

- Multi-purpose fluid, chemical, bulk handling

Special Features

- Crimpnoology Nipples provide an excellent fitting solution for medium-pressure applications such as “Frac Hose”, mud-pump hose, and other abusive applications.
- Long Shank Crimpnoology Nipples provide excellent sealing and retention for high-pressure applications (See ratings chart below).

MAX. SYSTEM WORKING PRESSURE (PSI @ 70°F) SEE NOTE 1

Hose System Components			Hose Size
